Our Mission Statement

Our mission for many decades is to remain the world's trusted technical leader in the AN Plumbing industry. Our commitment is to provide you with critical knowledge to purchase the best hoses, hose ends, and fittings for your project. This is necessary as more engineers and builders are learning that the AN Fitting industry has been inundated over the last 30 years with dozens of counterfeit and sub-par fittings. These fittings from dozens of new companies are made from inferior materials and designs that are pushed onto the unknowing public with mis-information and outright lies by sellers. All of this is enabled by a U.S. Customs loophole in the aluminum AN fitting industry that allows fittings to be entirely unmarked, or laser etched as, "Made in USA" if a majority of the costs to transform the item, and package it for sale on US soil. Therefore, our mission is to offer only hose ends, hoses, and adapters that we have concluded to be made from correct materials for each application, and from only companies who honestly maintain the tribal knowledge of the original AN system that began so many years ago for good reasons.

About the Brands

XRP is the most trusted and sought after brand in the market. They are a U.S. based manufacturer headquartered in Los Angeles in the heart of the Aerospace Industry where many of today's A.N. fittings and hardware innovations are born and bred. XRP fittings are considered the pinnacle of achievement and the gold standard in all A.N. style hose, hose ends, and adapters in every circle of motorsports, marine, and prototype vehicle design. XRP fittings, hose, and hose ends are only for use off public highways, motorsports, powersports, marine, and racing applications. XRP fittings, hose, and hose ends are not for use on Aircraft, and are not FAA approved. XRP hoses are also not Coast Guard approved.

offers

fittings from various Aerospace manufacturers in the U.S.

These are machined to either AN, MS, or AS standards and anodized in Mil Spec type 2 Blue. These particular items are generally machined in 3A and 3B quality (A.K.A UNJ threads) which are a requirement of the aircraft industry. Material Certs are available in some cases on request prior to ordering.

is a subsidiary of Holley Performance. It is a Globally Sourced brand with some items made in the U.S and abroad. Earl's Speed Seal PTFE hose and hose end system is considered the finest in -3,-4,-6,-8, & -10 higher pressure PTFE systems which still maintains its roots in the original M.S. hose end design.

GOODRIDGE is a global manufacturer specializing in unique brake line fittings. Here, we offer their most critical banjos and banjo bolts required for various mission-critical systems.

is a subsidiary of Danfoss and a globally sourced item. Here, we offer their complete air conditioning hose and hose end system.

is a U.S. manufacturer specializing in high quality aluminum distribution blocks.

XRP ProPlus™ system utilizing a carbon impregnated anti-static PTFE inner tube that is manufactured using a patented process that creates a smooth interior wall surface and convolutions only on the outside of the tube wall where they belong for increased flexibility and vacuum resistance. There are no convolutions on the inside where they can impede flow by causing turbulence and trapping contamination that can be very difficult to remove. XRP ProPlus™ Race Hose has been designed and sized to directly target fully convoluted PTFE hose product in weight and bend radius while allowing for much greater flow rates due to the smooth inside tube wall. The smooth inside bore allows non-turbulent laminar flow capabilities and a hose assembly that can be cleaned out much easier than fully convoluted hoses.

These race reusable hose ends, designed for use with XRP ProPlus™ Race Hose, allow easy assembly without the need of a crimping machine. They are available in straights, as well as all standard angled bent tube ends (30°, 45°, 60°, 90°, 120°, 150° and 180°), in both a fixed style and full swivel, and jump sizes. All XRP hose ends are available with full hex swivel nuts or with lightweighted turned down (TD) swivel nuts.

PRO SERIES Pre Assembled PTFE Hoses with XRP ProPlus™ Hose and XRP Race Crimp Hose Ends are offered with (XS) Stainless Steel Braid or (XM) Monofilament Braid. These are superior in flexibility and weight savings than our economy pre-made hoses. All assemblies from ANplumbing are 100% made in the U.S.A by our in house technicians. ProPlus™ PTFE Hose is smooth bore internally and carbon Lined with a convoluted exterior wall making it very flexible. Maximum Pressure for these assemblies is recommended at 600 PSI for Stainless Steel Braid and 250 PSI for Monofilament Braid. XRP ProPlus™ Hose and Hose Ends are Made in the U.S.A. Hose is submersible.

HS-79 ultra lightweight, flexible, smooth-bore PTFE hose has a 4-ply composite construction: a PTFE inner liner, Silicone outer liner, high tensile stainless steel reinforcing braid and outer braid of aramid fiber. HS-79 hose is available with a CSM (Hypalon) outer covering as a fifth layer for added resistance against abrasion and ease of cleaning. This is widely considered the number one hose in the ANPlumbing industry.

Pre-made Pro/Economy Series PTFE Hoses

SKU: SS6 **B/C**

First number indicates A.N. Size

First set of numbers indicate angle of hose end.

Second set of numbers indicate angle of other hose end.

Final set of numbers indicate length of hose ranging from 6"-240". If bigger than two digits extend to three digits.

Example SKU: SS63010106B

B indicates a black coat on the -3 hoses. C indicates a clear coat on -3 hoses.

Pro Series PTFE Hoses are equipped with stainless steel hose ends as well as black or clear coated hose.

-4, -6, -8, & -10 Pre-made Economy Series PTFE Hoses

SKU: 6 BK/BL

The second number indicates A.N. Size

The first set of numbers indicate angle of hose end.

Second set of numbers indicate angle of other hose end.

Last set of numbers indicate length of hose. If bigger than two digits extend to three digits.
Example SKU: 63010106BK

BK indicates black hose ends & BL indicates blue hose ends.

ECONOMY SERIES pre-assembled PTFE .030" wall hoses can be used for many uses where a carbon lined PTFE lined hose is preferred for a barrier to alcohol and various fuels, oils, and cooling fluids. Hoses are tested before delivery. If you don't see it in here, call us for special assemblies. HOSE LENGTHS ARE MEASURED FLARE TO FLARE +/- 1/2". (not recommended for high pressure power steering or hydra boost systems) All assemblies from ANplumbing are 100% made in the U.S.A by our in house technicians.

XRP stainless braid-protected synthetic rubber hose is the premium quality racing hose depended on by the top racing teams of every professional sanctioning body in the world. XRP features an inner liner of synthetic rubber. A partial coverage protective sheath of stainless steel braid is embedded in the liner during manufacturing. The reinforced hose liner is then bonded to a full-coverage outer protective sheath of high tensile stainless steel wire braid. Introducing XR-31 from XRP! A perfect mix of Stainless under braid and fabric outer braid and 100% constructed in the USA. (*NOTE: STAINLESS STEEL UNDERBRAID IS NOT USED IN -20 HOSE*) XR-31 consists of an inner tube of oil resistant "PKR" synthetic rubber. A partial coverage stainless wire inner braid and an oil, weather, and abrasion resistant, black, entangled filament nylon fiber cover.

Sold by the foot in continuous length

***Watch assembly video on ANPlumbing.com under Tech Resources, click on "Traditional Hose End Assembly" ***

These reusable nipple-and-cutter style hose ends are compatible with our Stainless CPE race hose and XR-31 hose. XR-31 looks especially handsome when paired with black anodized hose end fittings. All hose ends are JIC 37° triple sealed and double swivel to allow for full angular positioning after assembly. Huge double-angled seat area provides line contact sealing and eliminates torque-induced cracking common to lightweight flared tube designs. 2024 alluminum alloy swivel nuts and cutters are T851 heat-treated for longer life. 6061-T651 aluminum sockets prevent stress cracking.

XRP Push-On Hose is constructed of Chlorinated Polyethylene elastomer tube, textile braid reinforced with CPE elastomere cover. Maximum Operating pressure is 250 PSI. Applications for this hose are leaded race fuel, lubricating oils, air and water.

XRP Push-On Hose Ends and Hose are super lightweight, easy to assemble and provide great performance. Machined from aluminum alloy, these hose ends are only compatible with our Push-On Hose, NOT the stainless steel braid or XR-31 Hose. Use Push-On Hose Ensure Clamps for all high temp & oil line applications.

The innermost primary barrier layer offers high resistance to heat and aggressive fuels. The middle Vapor Guard barrier is a thermoplastic layer that provides superior fuel isolation and virtually eliminated vapors escaping through the hose. The exterior cover barrier provides extreme tolerances to heat and ozone giving Vapor Guard a three way shield against hose deterioration. Matching Vapor Guard hose ends feature a special smooth retention bead that retains the hose under pressure while assuring the hose liner is not damaged. **SAE J30R9 Spec.**

Earls Vapor Guard Hose Information

Multi-layer rubber hose with a liner	Rated Maximum 225 PSI
Reinforcement braid-aramid material	Use with Vapor Gaurd or Push-On

Aeroquip Air Conditioning PTFE Hose & Hose Ends

This new and innovative product offers discriminating automotive enthusiasts a superior hose and fitting combination specifically designed for A/C component applications. This attractive hose has a stainless steel outer braid with a nylon inner tube for superior performance. Custom designed nickel plated steel reusable fittings, with available charge ports, are an eye appealing compliment to complete these field servicable hose assemblies.

Fyre Jacket is a smooth silver silicone-coated glass sleeving, engineered to withstand continuous temperature up to 500°F. Fyre Jacket can provide short term direct flame protection and is expandable for easy installation over completed hose assemblies. This product to provide a tight fit.

Fyre Foil II is a very lightweight fiberglass sleeving laminated with a mylarized aluminum surface that provides radiant heat protection to 800°F. The mylar surface resists abrasion and brake fluid. Fyre Foil II is NOT expandable and should be slipped over the hose before assembly

Earls Flame Guard

Earl's nonasbestos flame guard is a very efficient insulating sleeve for hose assemblies. It is made under a special process from a silicone rubber outer and braided glass inner sleeve bonded to the rubber. Meets AS1072 for aerospace flame protection applications. Operating temperature -65°F to +500°F w/ splashes up to 2000°F.

NOTE: Due to these thread options below being so close together (.525" for 1/4 NPSM and .562" for the 9/16 -18) These are commonly mis-purchased and incorrectly installed causing failure. Please confirm your thread requirement before purchasing. DO NOT RELY ON MAKE & MODEL INFORMATION.

Clutch Adapter Fitting - Stainless

Stainless	Male A.N.	Description
652504ERL	-4	Late Model Ford/GM/Chrysler Master Cylinder and Clutch Release Bearings.
LS641001ERL	-4	Early Model GM/Jeep/Mopar Master Cylinder and Clutch Release Bearings.
LS640281ERL	-4	GM/Jeep/Mopar Master Cylinder & Clutch Release Bearing. Fits Most Early T-56 Clutch Release Bearings & Slave Cylinders
LS641002ERL	-4	OEM GM/Jeep/Mopar Master Cylinder and Clutch Release Bearings.

Clutch Adapter Fitting - Quick Connect

Black	Male A.N.	Description
LS0024ERL	-4	Fits Late Model T56 Hydraulic Clutch Release Bearing, Includes Release Tool.

Black	Male A.N.	Male A.N. - B
1128ERL	-6	-6

There are always clearance challenges when doing an engineswap. One of these is routing the transmission cooler lines off the side of the transmission while cleaning the trans tunnel. Earl's makes this easier with their line adapters. Integrating into the GM transmission and adapting to AN lines allows additional clearance and freedom that original hard lines cannot. Adapters are available for the popular GM Transmission 4L80E (Fits Transmissions w/ 9/16-18 or 1/4-18 threads long/rear). Order two adapters (one short for the front and one long for the rear to match the threads on your transmission). The thread size varies depending on the application.

We offer this professional grade ANNEALED 304 Stainless Steel Tubing in straight lengths of up to 20 feet in length in store. (For UPS or Fed Ex orders the max length that can be shipped is in 8 foot long increments or less.) **PLEASE NOTE: Our Stainless Steel tubing is carefully sourced and inspected to insure its quality and longevity in use. Unlike low quality, off-shore Stainless Steel tubing, which tends to be cheaper in price and primarily offered in 20 & 25 foot coils, our tubing is guaranteed to perform.** Easy to form in single or double flare. (double flare requires high quality forming tool). Emission Code 5.

Easy Form Hard Line Coil (Ni-Copp)

Copper	Tube Size	Wall Thickness	Length
NC631625ERL	3/16	.028"	25ft
NC641625ERL	1/4	.028"	25ft
NC651625ERL	5/16	.028"	25ft
NC661625ERL	3/8	.028"	25ft

Easy Form Hard Line Coil w/ Tube Nuts (Ni-Copp)

Copper	Tube Size	Wall Thickness	Length	Tube Nuts Included
NC6316KERL	3/16	.028"	25ft	(10) 3/8"-24, (2) 7/16"-24, (2) 9/16"-18, (2) 1/2"-20.
NC6416KERL	1/4	.028"	25ft	(5) 7/16"-24 Short, (2) 7/16"-24 Long, (2) 9/16"-18, (2) 1/2"-20.
NC6516KERL	5/16	.028"	25ft	(10) 1/2"-20
NC6616KERL	3/8	.028"	25ft	(10) 1/2"-20

Easy-Form Ni-Copp tubing is made from a copper-nickel alloy that is as strong as steel, but much easier to bend and flare. This alloy is approximately 90% copper and 10% nickel, and should not be confused with typical copper tubing found at hardware stores. The copper-nickel blend is much easier to form (so easy that it does not require a tubing bender, it can be bent and formed with just your hands). This type of copper-nickel alloy brake tubing has been used since the 1970's on OEM vehicles including Volvo®, Audi®, and Porsche®. Easy-Form doesn't rust or corrode and is DOT approved for use on hydraulic brake systems. Emission Code 5.

Olive Hard Line Coil - Steel

Olive	Line Size	Length

ZZ6616KERL	3/8	25ft	(10) 5/8"-18.

Earl's steel hardline is a double wall low carbon steel, copper brazed tubing that has an olive PVF coating. The olive coating is a PVF (poly-vinyl-fluorine) material that provides superior corrosion protection and is ideal for vehicles that are exposed to snow, salt, salt air, gravel or other harsh environments. Emission Code 5.

XRP's in-line fluid filters, for oil or fuel, offer significant design features for optimal fluid delivery. The Filter's modular construction allows you to assemble a filter with a variety of ends and elements. This versatile, state-of-the-art design in long or short options are our largest capacity filter. Made in USA with high quality weight saving materials that delivers high flow capacity, high pressure, and high temperature.

Return Policy

ALL RETURNS AND EXCHANGES MUST BE APPROVED BEFOREHAND AND ISSUED AN R.G.A # FOR YOU TO RECEIVE STORE CREDIT. Packages without an R.G.A clearly visible on the outside of the box will be returned to you postage collect. The return shipping cost is your responsibility unless the merchandise was damaged or defective or was received in error. ALL PARTS ARE INTENDED FOR TRACK USE ONLY AND IN MANY CASES WILL VOID YOUR WARRANTY AND INSURANCE POLICIES. INSTALL ALL ITEMS AT YOUR OWN RISK. BE ADVISED YOU ARE PURCHASING ITEMS THAT ARE NOT D.O.T, F.A.A or COAST GUARD APPROVED. ALL APPROVED RETURNS ARE FOR STORE CREDIT ONLY.

The following parts are not returnable for exchange or store credit:

Oil coolers, Hose, Pre-made hoses, Part numbers beginning with "MS", "AN" or containing a "C", "J" or "D", Tools, Filters, Surplus & liquidation Items, Aircraft Hardware items.

A 25% RESTOCK FEE APPLIES TO ALL RETURNS FOR EXCHANGE OR FUTURE STORE CREDIT.

Warranty Policy

ANplumbing.com endeavors to offer its carried product lines of hose, hose ends and adapters as the highest level of products offered in the genre. In-house assemblies are tested, welded components are pressure tested, machined parts are inspected prior to assembly, and all pre-assembled hoses are reinspected prior to shipment. All products sold by ANplumbing.com are subject to the following warranty at time of shipment: ANplumbing.com warrants that said products will be free from defects in material and workmanship for 90 days. This warranty is limited to the repair or replacement of said products and in no event shall this warranty exceed the original purchase price of the products, nor shall ANplumbing.com be responsible for special, incidental or consequential damages. This warranty does not apply to any product subjected to damage in transit, accident, misuse, or abuse following the date of original purchase. ANplumbing.com reserves the sole and exclusive right to determine if the defect is due to material and/or workmanship or other cause. Any product believed to be defective should be returned immediately. It is expressly understood and agreed that this warranty shall be in lieu of all warranties of fitness and in lieu of the warranty of merchantability and there are no other warranties, express or implied.

Parts and Labor

Parts and labor are sold on a development basis. CANCER & REPRODUCTIVE HARM on all items. ALL PARTS ARE INTENDED FOR TRACK USE ONLY AND IN MANY CASES WILL VOID YOUR WARRANTY AND INSURANCE POLICIES. INSTALL ALL ITEMS AT YOUR OWN RISK. BE ADVISED YOU ARE PURCHASING ITEMS THAT ARE NOT D.O.T, F.A.A or COAST GUARD APPROVED. (www.p65warning.CA.GOV)

Domestic Orders

Free shipping is currently offered on orders \$140 or more*. Once shipped, please allow up to 7-10 business days for your order to be delivered when standard ground or postal shipping option is chosen. Delivery times will vary depending on weather and location. If you wish to receive your order sooner, you can upgrade freight by choosing from the variety of shipping options we offer. For orders shipping free of charge we will choose from all of our subscribed services available in your area. (*Free shipping thresholds may change without notice)

B2B Wholesale

For customers with B2B wholesale default pricing, free shipping will be based on what discount group you are in. Please contact us for those price brackets to see at what level your free shipping occurs.

Domestic shipping

Domestic shipping can either be via UPS, FedEx, or US Postal Service (USPS). Orders going to APO/FPO, Hawaii, Alaska, Puerto Rico and other US territories can only be shipped via USPS. The shipping charge is automatically calculated upon checkout and is dependent on the weight of the items, your shipping address, and how soon you need it.

Domestic orders with Express Shipping (UPS NEXT DAY, & 2nd DAY AIR, or FedEx Overnight and FedEx 2-day) will ship same day unless otherwise notified by email or phone. If you selected 2-day shipping on a Thursday or overnight shipping on a Friday, the order will usually get delivered on the next business day. If you wish to choose Saturday delivery, please put a note on special instructions. There will be an additional charge for this option which will depend on your shipping address. This option may not be available to some addresses. US Postal Service is usually the cheapest option, however there is no guarantee with delivery timing. Please note that US Postal Service shipping option is not the same as UPS 2nd day air or FedEx 2-day shipping. Due to current domestic and global conditions, no timing guarantees are being offered by any of the freight services due to the current global logistics crisis.

International Shipping

We ship internationally via FedEx International Economy or Priority, or USPS-EMS. It can take up to 10 days to process and ship international orders.

For Tracking:

Log in to your ANPlumbing.com account or go directly to the following websites:

UPS: <http://www.ups.com> or Call 1-800-PICK-UPS.

FedEx: <http://www.fedex.com> or Call 1-800-Go-FedEx.

USPS: <http://www.usps.com> or 1-800-ASK-USPS®

All Orders that are received weekdays before 11:30 am Pacific Time (2:30 pm Eastern Time) will ship as follows:

GROUND & ALL US Postal Service Shipping orders will usually ship within 1-4 business days. We do not process shipments on weekends.

Tracking numbers will be automatically sent to your email. Make sure to check your spam file for our emails. 99% of orders ship complete within 1-3 days. If there is an issue with your order, you will be informed via phone or email of the expected availability date. We can ship a partial shipment if need be. For partial shipments, backordered items ship free of freight charges when they become available.

Most tracking numbers update within 24 hours, however US Postal can take up to 3 days to update in their system. Once an order leaves our warehouse, we do not have control over it. For any issues with shipping such as an order getting lost, please contact us so we can file a claim on your behalf.

Privacy Policy

WE ARE COMMITTED FIRST AND FOREMOST TO YOUR ANONYMITY AND PROTECTING YOUR PRIVACY.

We use your information only to process your orders. Unlike other online order sites and stores, we do not sell your info to direct mailing houses. We also assure you that we only keep your information for the processing of your orders. You will never receive a mailer from us, you also will never receive junk emails from us, and you will never receive sales calls other than to deal with your orders from us.

Additionally, we do not do business with off-shore call centers or financial institutions that have call centers off-shore. All of our bank and technical advisors are on U.S. Soil and will remain that way. We hope that you share our passion for privacy in today's increasingly hostile environment to personal privacy. We also hope that you share our passion to put America first in everything we do.

Thank you for your patronage.
